EDUCATION

Chulalongkorn University, B.Eng. Computer Engineering (Expected 2029) GPAX: 3.68

AWARDS

Bronze Medalist – The 20th Thailand Olympic in Informatics (TOI20) May 2024

- National-level competitive programming and algorithmic problem solving competition.

EXPERIENCE

Innovasive Co, Ltd. – Frontend Developer Internship 17 May 2026 - 31 July 2026

- Developed and implemented user stories using React with AI workflow.
- Participated in daily team meetings, project meetings, sprint meetings to stay aligned with the team.
- Coordinated and communicated with other teams to ensure smooth and efficient development.
- Managed and tracked product backlog items using Plane and collaborated with designers through Figma.

Vishnu 24th – Frontend Developer June 2026 - July 2026

- Developed frontend features using Next.js and Firebase with the development team in an Agile workflow.
- Participated in team meetings, and helped plan to ensure the project finishes on deadline.

FE Camp 19 – Frontend Developer Oct 2025 - May 2026

- Developed and maintained frontend features using Next.js, Tailwind CSS and ShadCN.

BUU POSN Camp – Teaching Assistant 2024 – 2025

- Assisted in teaching data structure and algorithms fundamentals, and designed grader problems.

EXTRACURRICULAR ACTIVITY

Hello CP53 – Activity Department July 2026 - August 2026

- Planned activities, and provided an engaging experience for first-year Computer Engineering students.

TECHNICAL SKILLS

Languages:	C++, Python, Java, TypeScript, Go
Library & Frameworks:	React, Next.js, Tailwind CSS, Express, Vue.js
Database:	PostgreSQL, Redis
Tools & Cloud:	Git, Docker, Postman, AWS, Supabase, Firebase

PROJECTS

Quonet – Post Forum Website

GitHub: github.com/mxilia/Quonet-backend, github.com/mxilia/Quonet-frontend

- Built a forum frontend with a **Next.js** following **Bulletproof Architecture** principles.
- Developed a **Go backend** using **Clean Architecture**, ensuring modularity and testability.
- Implemented **rate limiting with Redis** and managed **PostgreSQL** for persistent data storage.
- Integrated **Supabase Storage** for scalable and secure **image uploads and media management**.
- Automated **Docker** image build and deployment to **AWS EC2** using GitHub Actions.
